

July 20, 2020

Dear Families:

Lockport Presbyterian home, an affiliate of Presbyterian Senior Care of Western New York, a nonprofit senior care community commenced its COVID-19 testing per the guidance of the NYS Department of Health in June 2020.

We are glad to share that as of the date of this letter, all staff and resident have tested negative for COVID-19. We will continue to test as required by the NYS Department of Health and provide updates as they become available.

“We will continue to take every step as recommended by authorities to prevent exposure or spread. As always, we are on top of the situation and the safety of our staff and resident remains our number one priority,” said Pam Flagler, Administrator.

We continue to offer every assurance to our residents, residents’ families and employees that our resident’s safety is our top priority and continue to provide updated information to our residents, their families and our staff as the information becomes available to us.

Lockport Presbyterian Home is a 24-hour Adult Care Facility, for adults age 65 and older. Our staff is always ready to support you with the care you need in a home like setting featuring two beautifully converted mansions that maintain their initial charm. We’ve been nestled in this residential neighborhood for over 60 years which makes it easy to call this community home.
